

From Self-service to Enterprise Power BI

- 5 easy steps

ORANGEMAN

Before we start

- ▶ Business Users?
- ▶ IT Professionals?
- ▶ All in one?

ORANGEMAN

Agenda

- ▶ Introduction
 - Delivery of Power BI
 - Business vs. IT
- ▶ The 5 easy steps
 1. Fix the dataset
 2. Ownership transfer
 3. Certify the dataset
 4. Authoring the dataset
 5. Brand the reports and apps

Delivery of Power BI

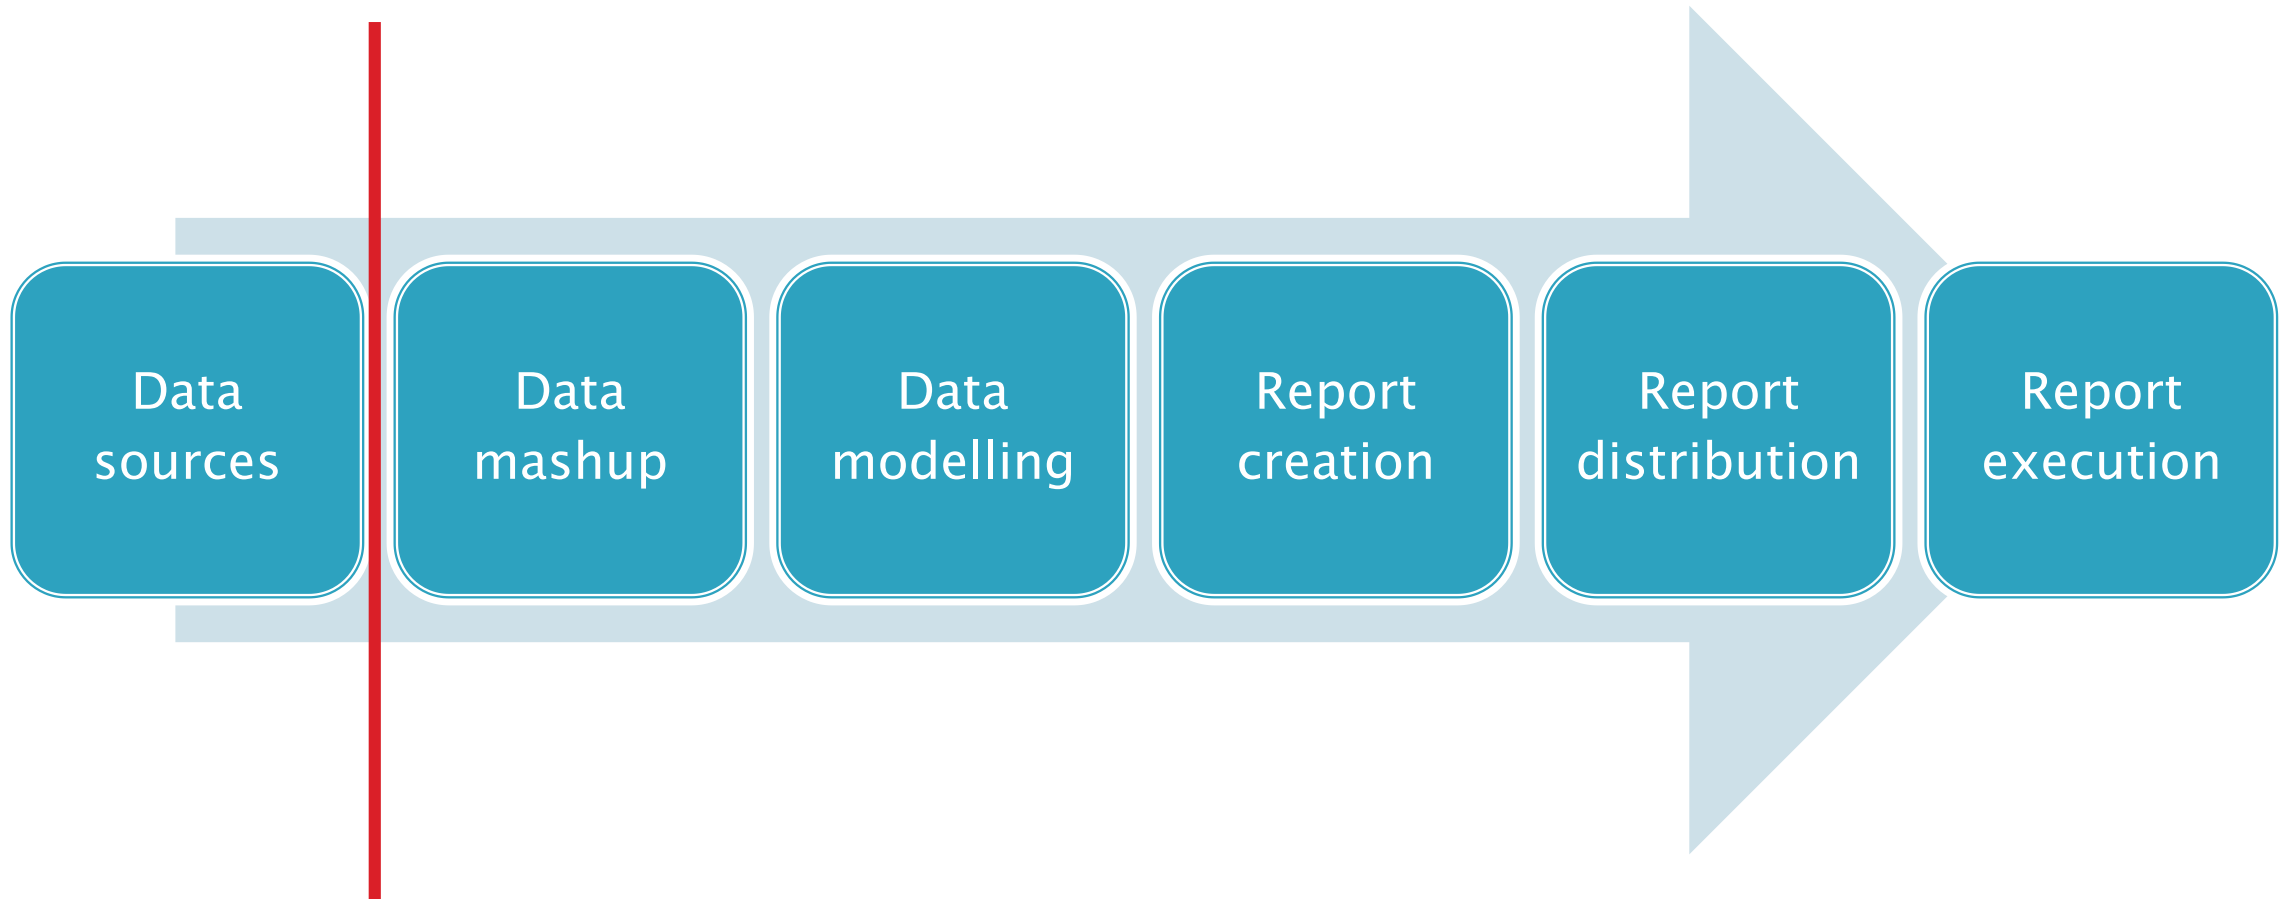

- ▶ Self-service vs. Enterprise BI

Delivering Power BI is not easy

Power BI development: IT vs Business

Power BI development: Agile development

Power BI Delivery Approaches

Business-Led Self-Service BI

Bottom-Up Approach

Analysis using any type of data source; emphasis on data exploration and freedom to innovate

Ownership:

Business supports all elements of the solution

Business users:

Data mashup, data modeling, report creation, distribution & execution

Governed by:

Business

IT-Managed Self-Service BI

Blended Approach

A “managed” approach wherein reporting utilizes only predefined/governed data sources

Ownership:

IT: data + semantic layer
Business: reports

Business users:

Creation of reports and dashboards

Governed by:

IT: data + semantic layer
Business: reports

Enterprise BI

Top-Down Approach

Utilization of reports and dashboards published by IT for business users to consume

Ownership:

IT supports all elements of the solution

Business users:

Execution of published reports

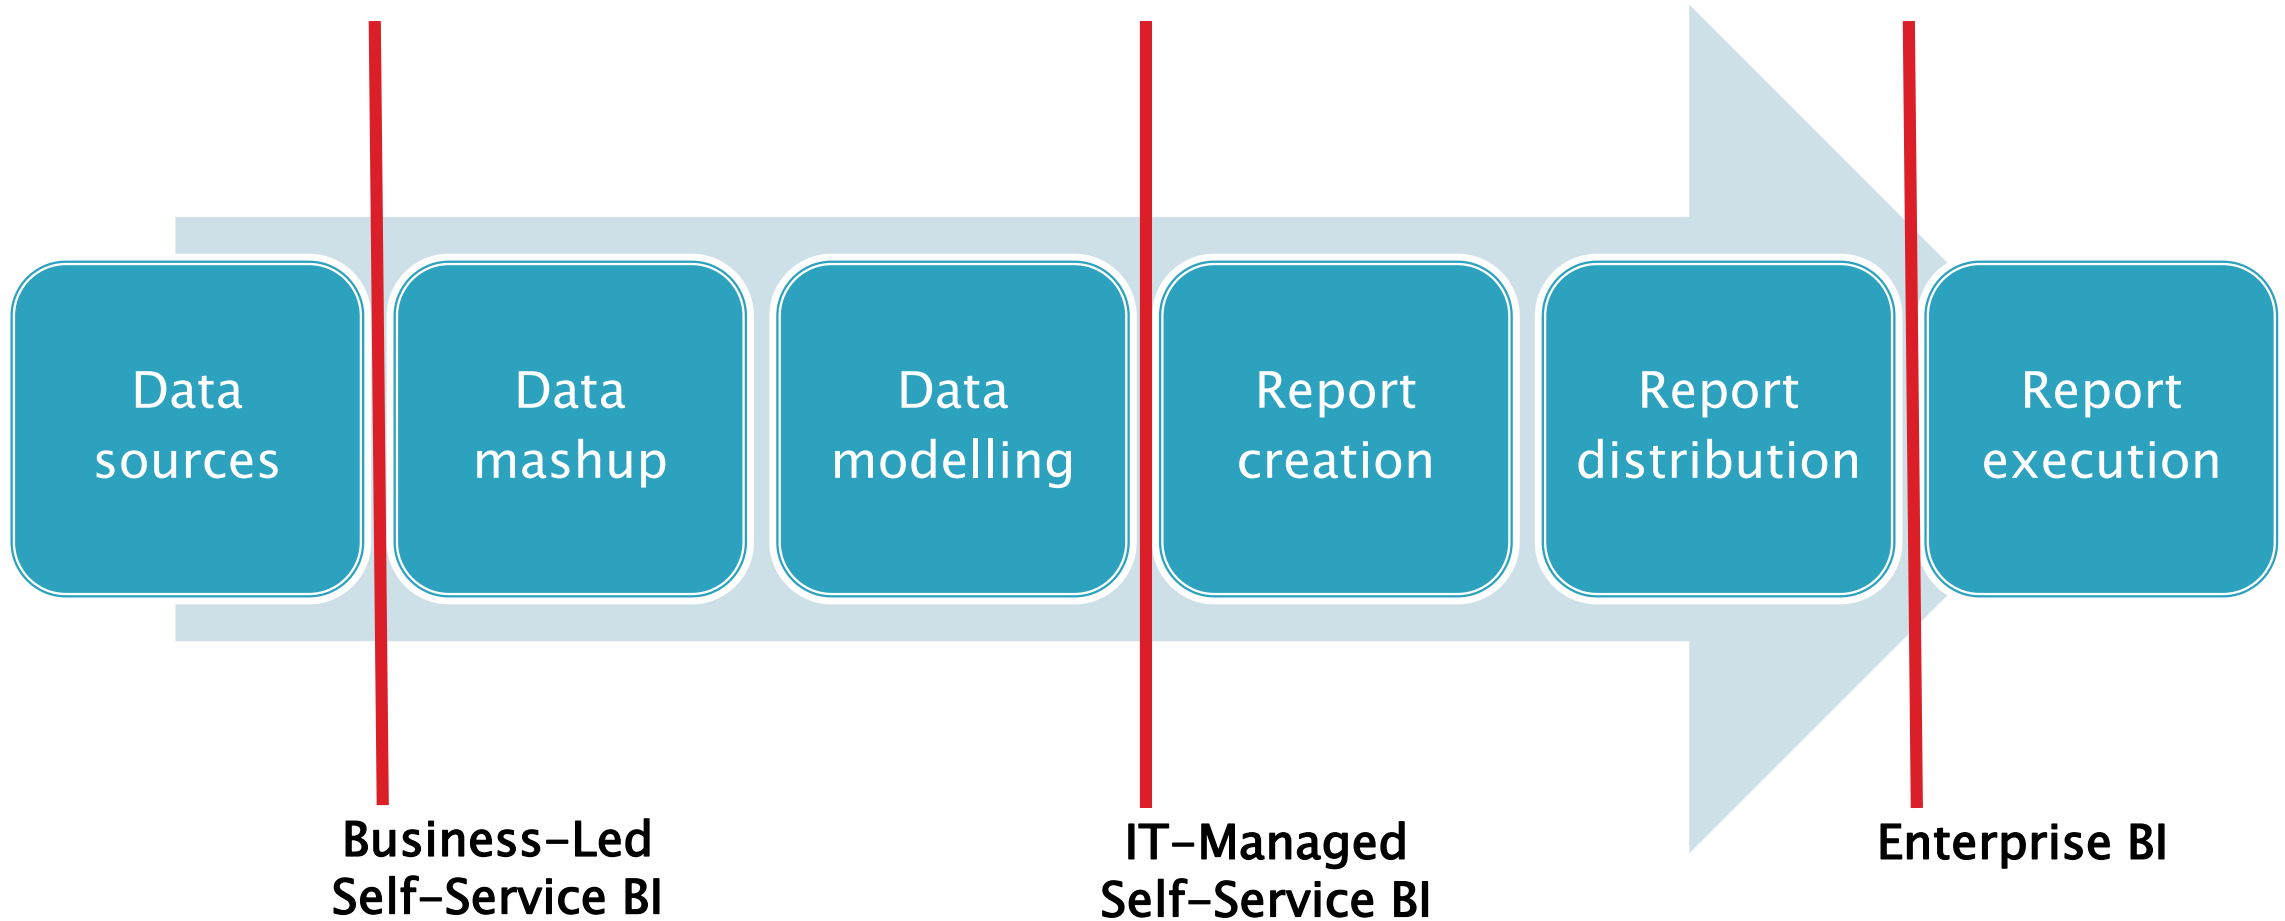

Governed by:

IT

Ownership Transfer

Over time, certain self-service solutions deemed as critical to the business may transfer ownership and maintenance to IT. It's also possible for business users to adopt a prototype created by IT.

Recap: Power BI Ownership Approaches

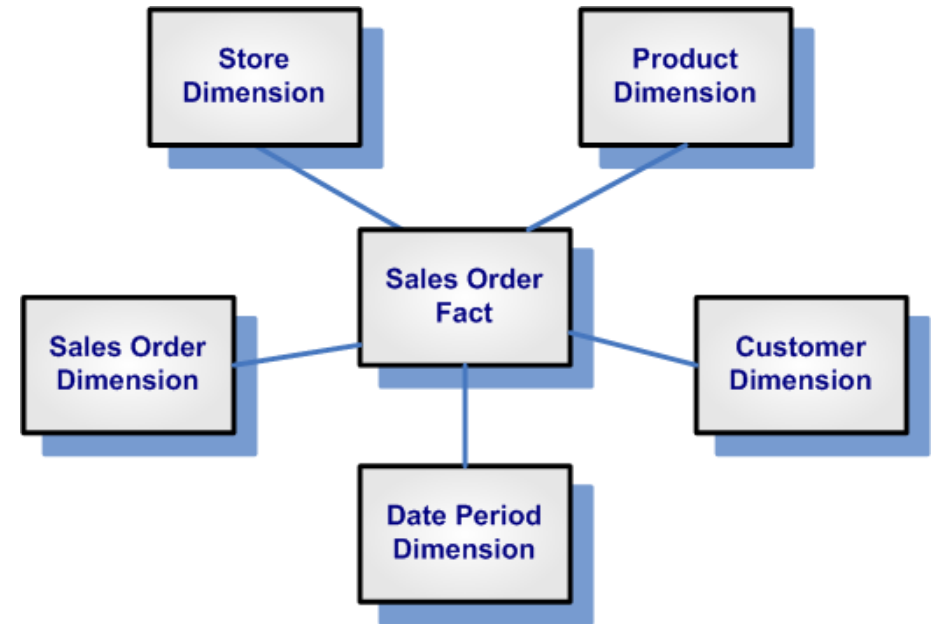

(1) Fix the dataset

- ▶ Star schema all the things

Star schema all the things

- ▶ Denormalize
- ▶ One table for each business entity
 - Attributes of an entity in the same table
 - Customer, product, resellers, sales
- ▶ Separation between facts and dimensions
 - Fact: something that happened
 - Dimension: something that describes a fact
- ▶ Pros
 - Very easy to understand at first glance
 - Very fast
 - DAX code is simple, as it should be

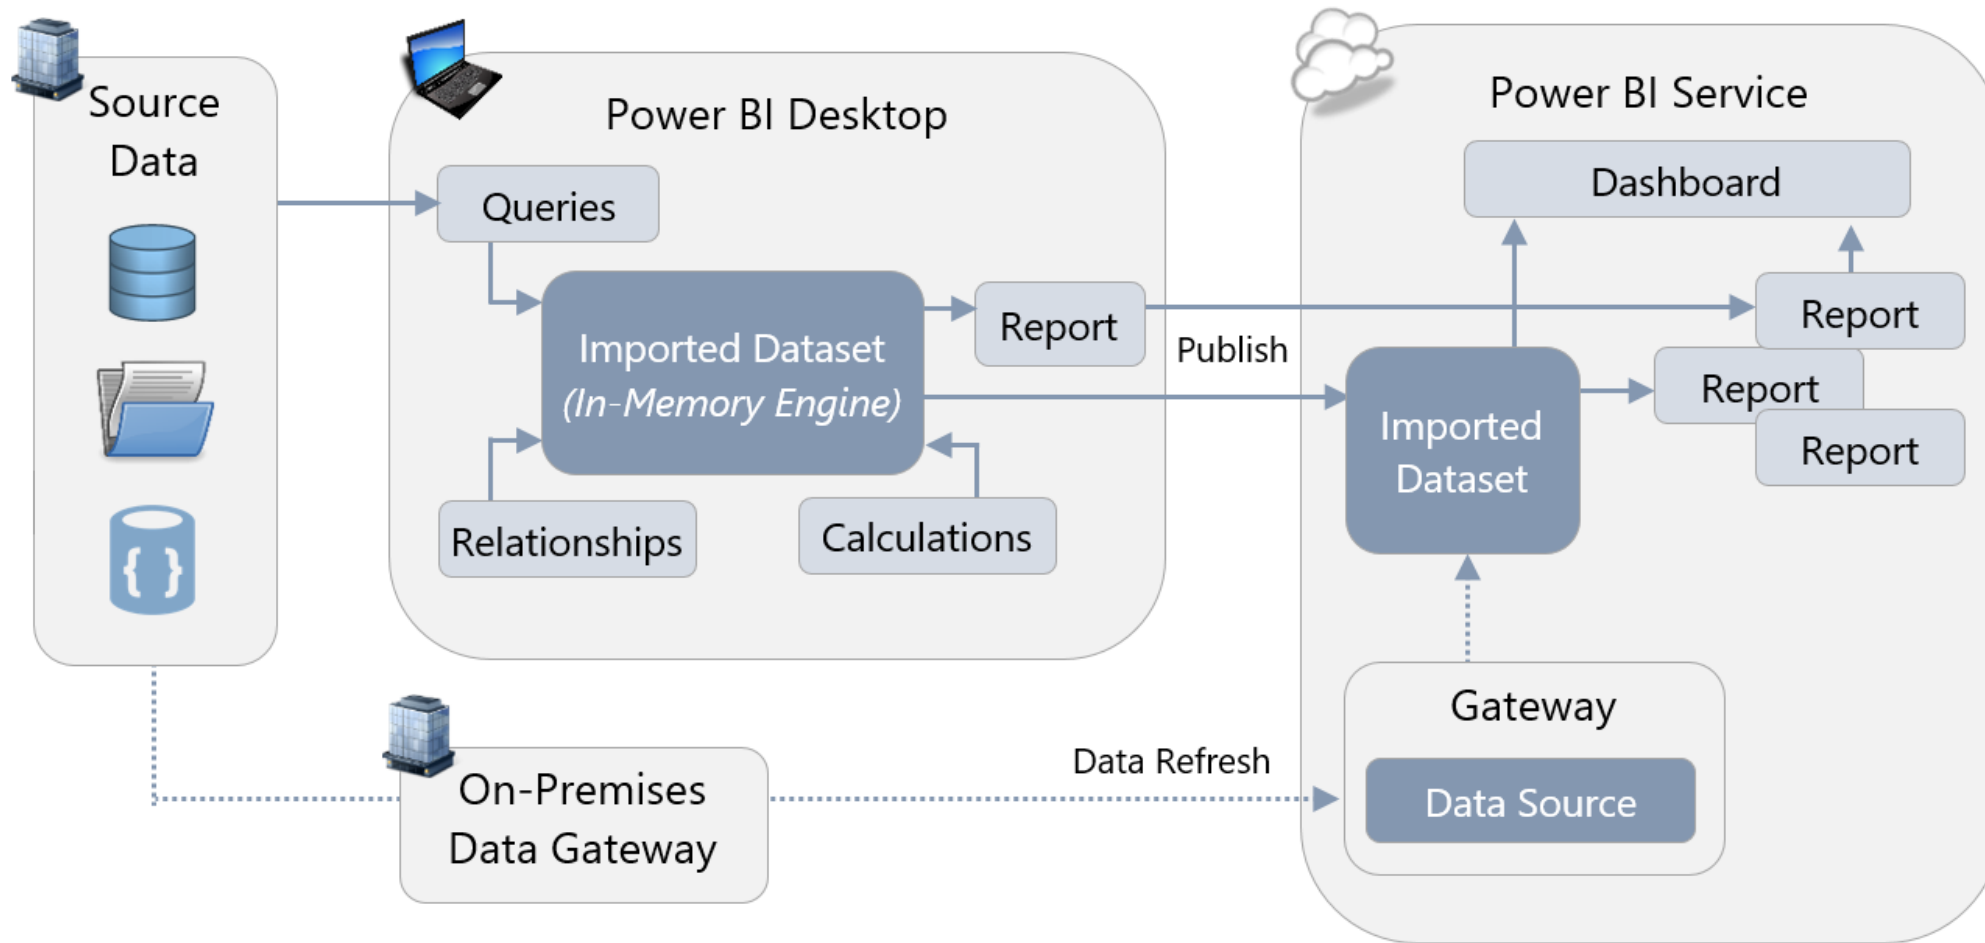

(2) Ownership transfer

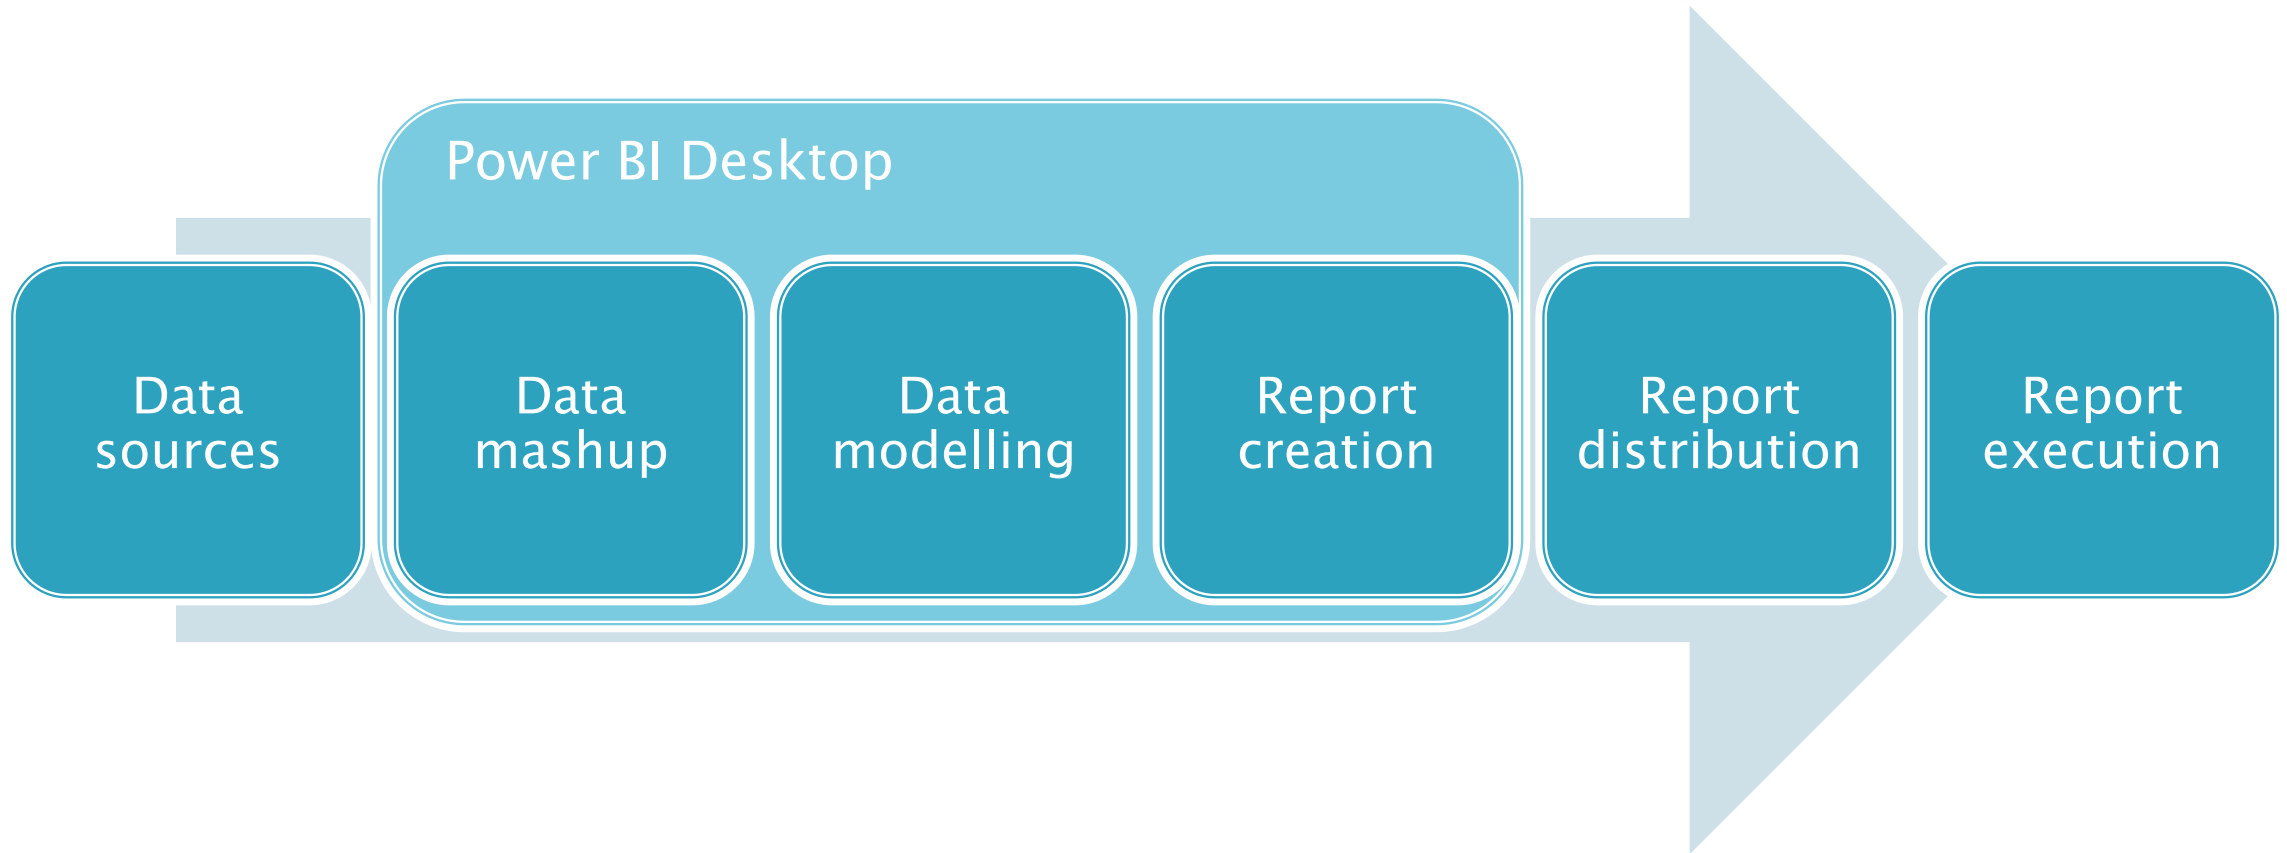

- ▶ Split the PBIX file

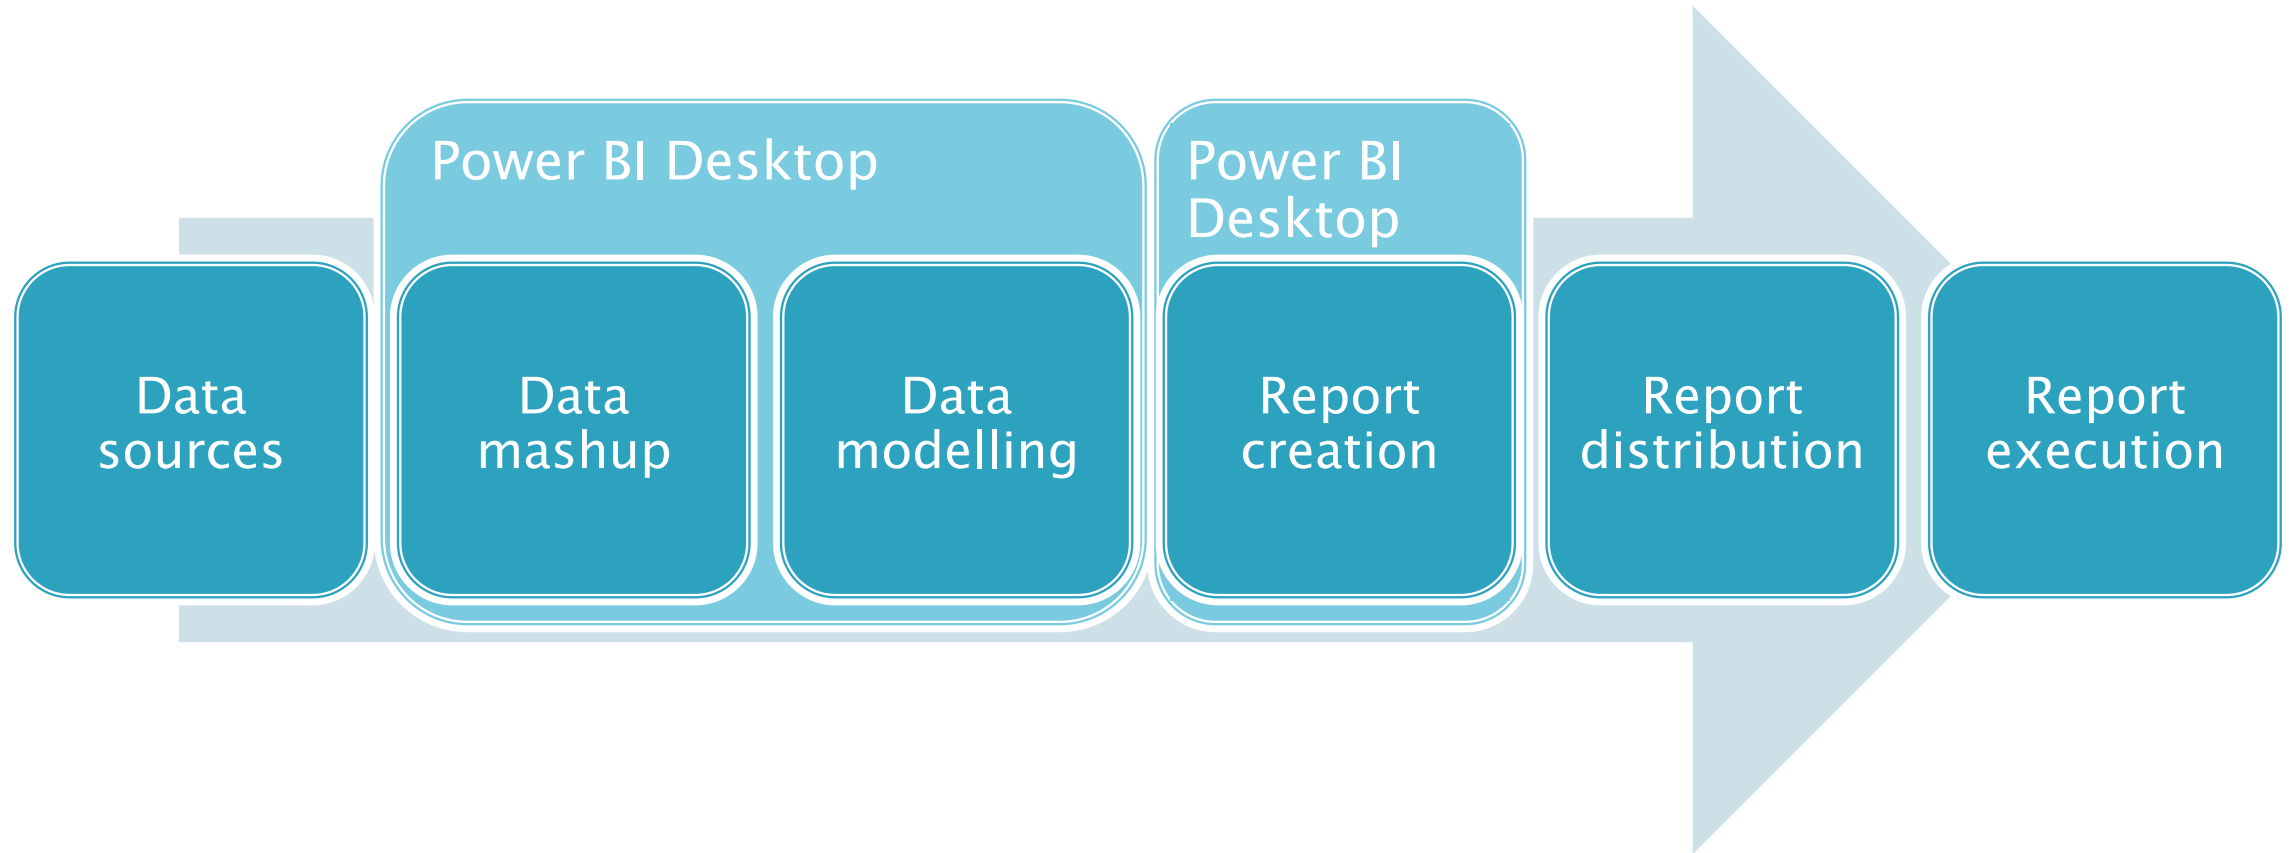

Business-Led Self-Service BI

Business-Led Self-Service BI

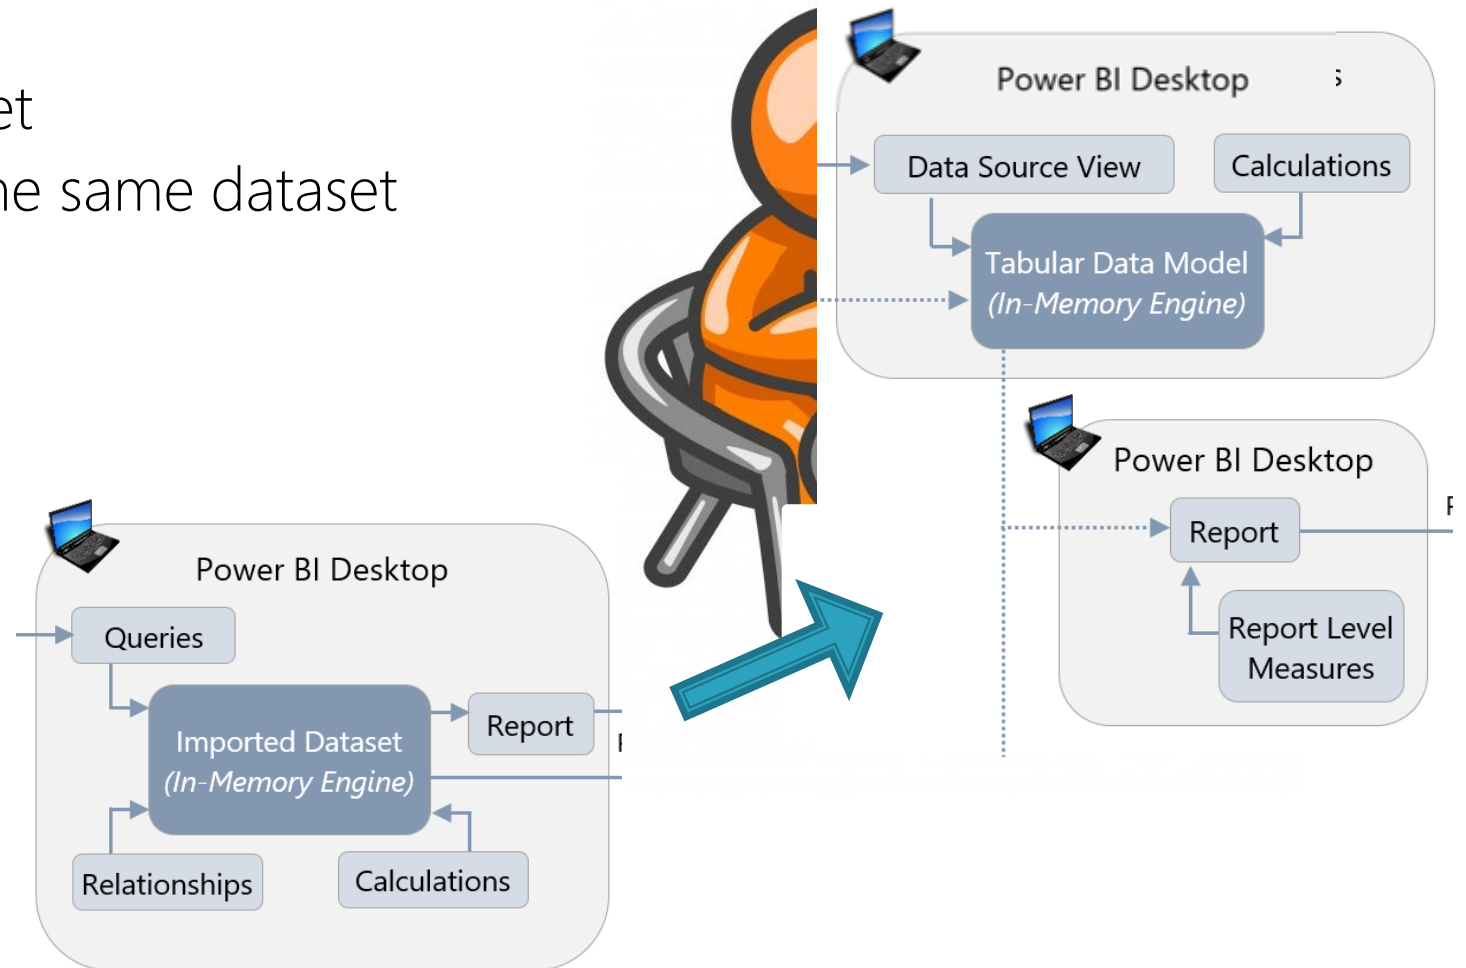

IT-Managed Self-Service BI

Demo: Ownership transfer

- ▶ Let se some Magic !
 - Split the report and dataset
 - Connect more report to the same dataset

(3) Certify the dataset

- ▶ The single version of the truth

Shared and certified datasets

- ▶ Reuse and preserves a single version of the truth
- ▶ Find reliable and high-quality data quickly and easily in both the service and Power BI Desktop
- ▶ Single dataset to be used by multiple reports, across workspaces

Select a dataset to create a report

All datasets ▾

Name	ENDORSEMENT ↓	Owner	Workspace/App	Refreshed
Retail Analysis	 Certified	Steve Myer	Retail	4 days ago
Customer Profitability	 Certified	Susan Mailer	Customer	6/23/17
Ventage Global	 Promoted	Lane Barnes	Ventage	3/3/18
IT Spend Analytics	 Promoted	Ari Gold	IT	3 hours ago
Team Analytics	 Promoted	Ana Smith	Analytics	7/12/18
Opportunity Analysis	 Promoted	Lane Barnes	My Workspace	6/12/17
Retail		Lane Barnes	My Workspace	2 days ago
Procurement Analysis		Lane Barnes	My Workspace	7/22/18
Sales		Lane Barnes	My Workspace	1/24/17

OK Cancel

(4) Authoring the dataset

- ▶ Modify and build your datamodel as a PRO developer 😊

XMLA endpoints – open-platform connectivity

- ▶ XMLA is the same protocol used for managing SQL Server Analysis Services and Azure Analysis Services models, a variety of Microsoft and third-party tools can be used with Power BI datasets
- ▶ Analysis Services engine in the Power BI service
- ▶ Taking **transfer ownership** to the NEXT level
- ▶ Preview feature!
- ▶ Requires Premium capacity!

Power BI merging with Azure AS

Enterprise BI

All BI users self-service BI users

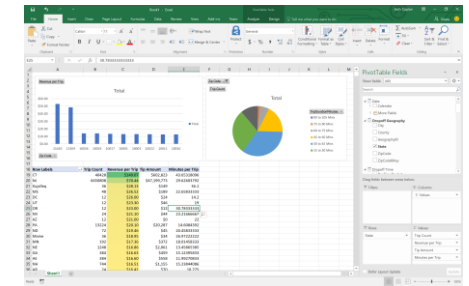

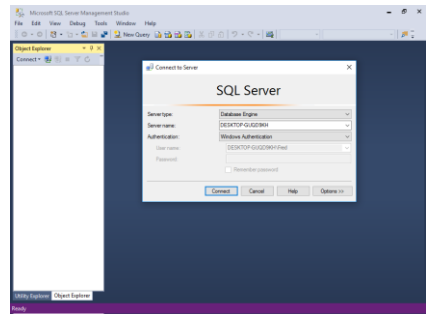

Azure Analysis Services Power BI
Premium

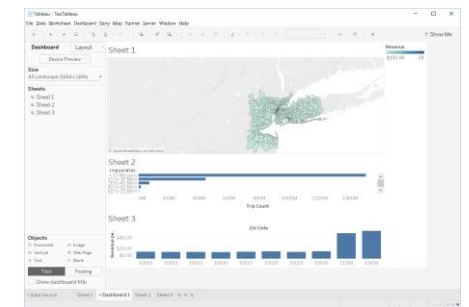

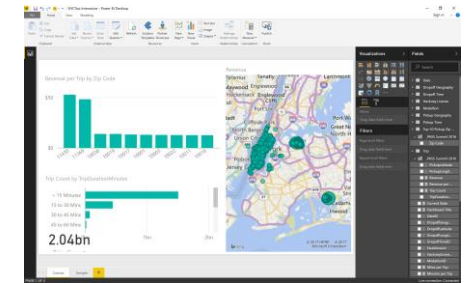

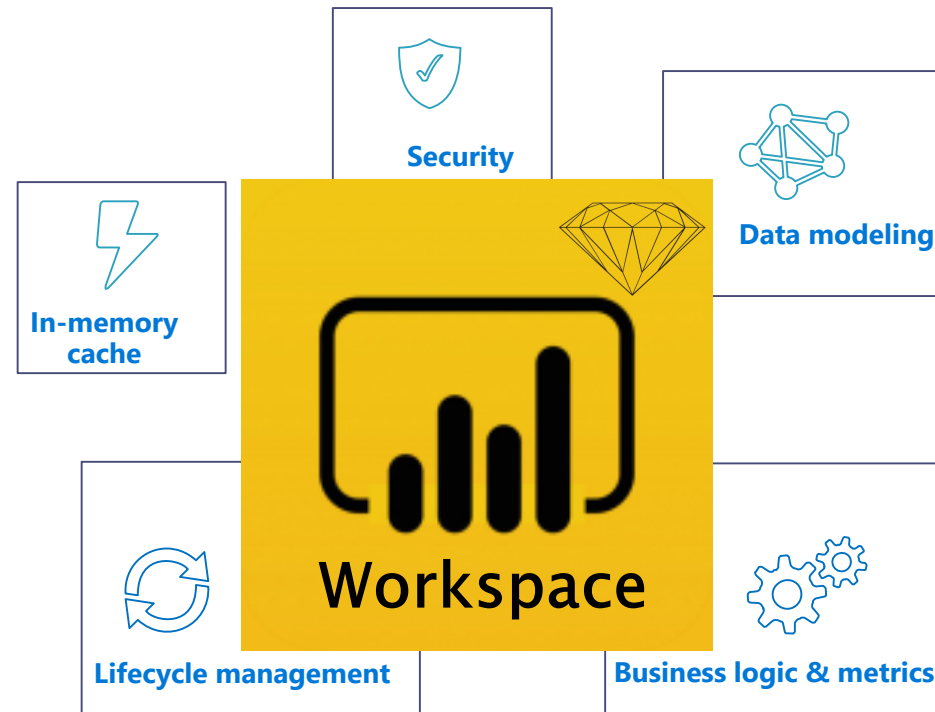

Power BI

Connectivity: Analysis Services

Development

(5) Branding

- ▶ Certify the Reports and Apps

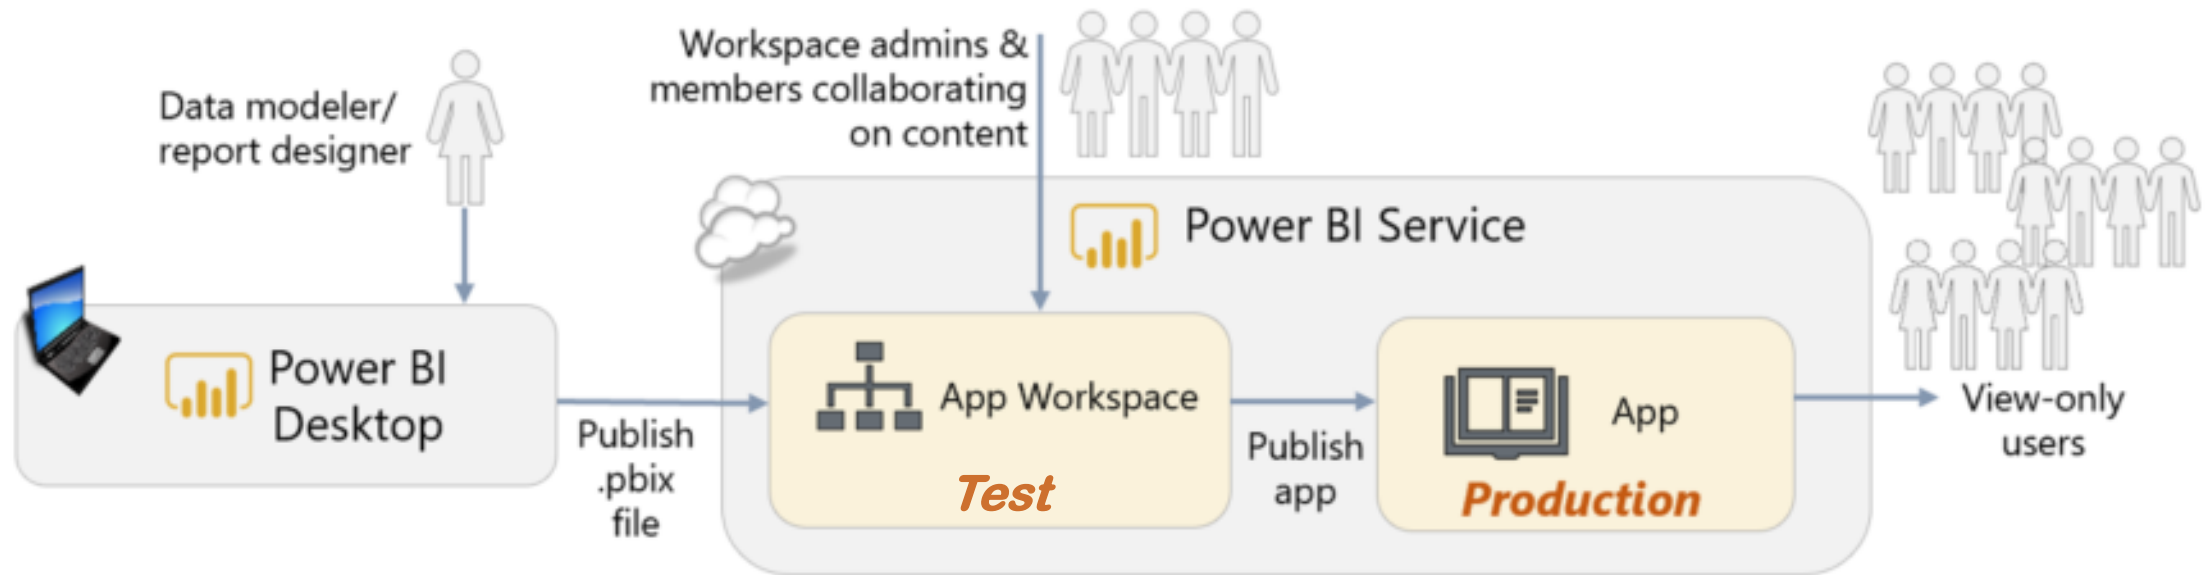

Workspaces – private and app

- ▶ Everyone has their own private workspace they can publish to. Its called: “My Workspace”. **Only** use it for:
 - Personal usage
 - Testing purposes
- ▶ App **Workspaces** is somewhere report developers can **work together** on the same business problem
- ▶ When you create an App Workspace you become its administrator and
 - Control its access and sharing settings
 - Add/remove members and contributors – viewer role is forthcoming.

Apps

- ▶ The contents of App Workspaces can be published as Apps
 - Possible to exclude items
- ▶ Other users can then 'install' the App or have it pushed to them
- ▶ When users install an App they can see the dashboards and reports in there
 - They can interact with slicers
 - They cannot edit the reports or dashboards
- ▶ New App navigation experience!
 - Customize the name and logo of your app
 - Setup navigation

Simple App deployment process

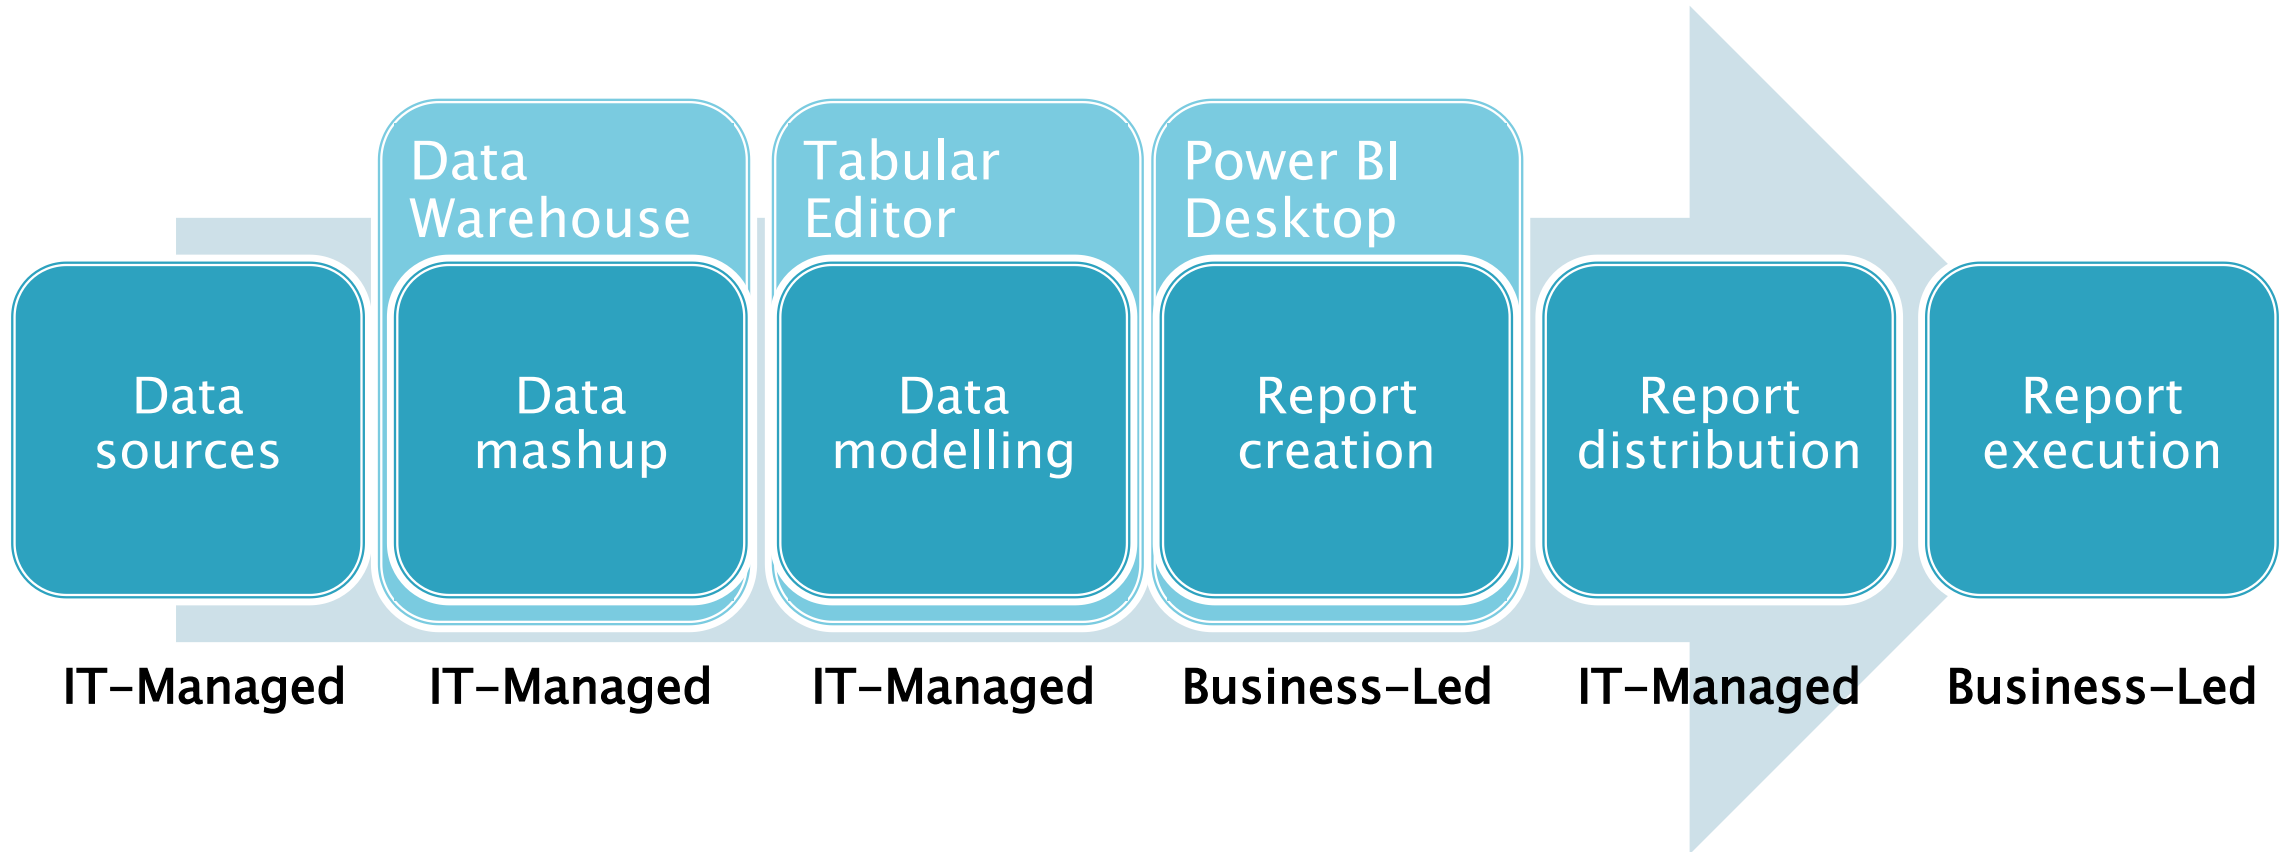

Demo: Branding – certify reports and apps

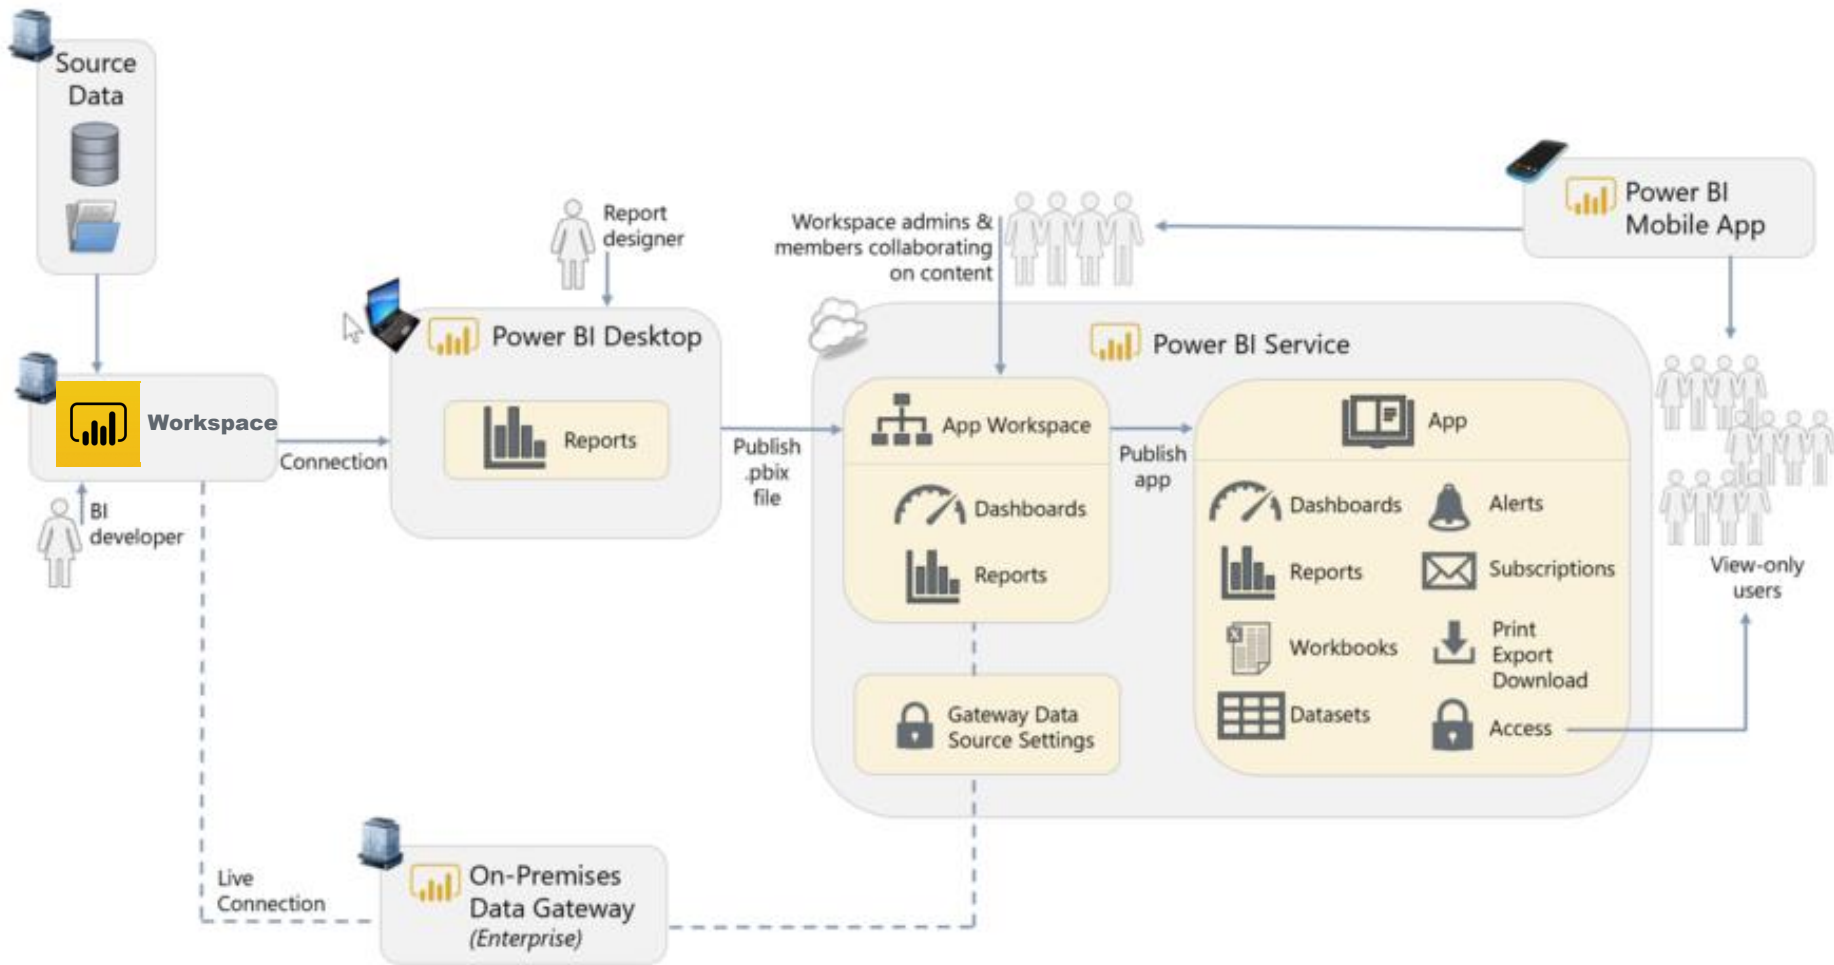

- ▶ Reports
 - Add background image
- ▶ Apps
 - Add app icon
 - Support site
 - Link in navigation

IT-Managed distribution
