- Governance models
- Monitoring
- Security boundaries
- Operational ownership
- ...

Slido

Fabric Administration, questions you may ask

- Should I be a Fabric Administrator?
- Why do my developers care about tenant settings?
- How can I check whether my Fabric environment is in a healthy state?
- What should I be aware of when administering my tenant?
- How do I really understand capacity management?
- How should I organize my tenant to support scaling?
- How should I balance security and governance against usability for end users?
